

FOR FUTURE PRICES

Market Until Next Cuban Season Begins

Strong Probability of Free Sugar Clause Becoming Effective Also a Factor

"The American people are not using sugar this year" is one explanation given for the steadily declining trend of prices in the New York market. "Fruit canners and preservers are putting up their wares with the minimum amount of sugar that can be used. The candy makers have always been a strong factor in the trade but here again sales have diminished and so less granulated is being sold by the refluers."

The most plausable explanation given of the phenomenal drop in prices on that the Business Difficult.

By special cables Cuba reports:

Receipts, 9,038 tons, against 11,445 tons and specifications. On this subtons last week 11,000 tons last year for remark:

"We are informed from Washington that the administration is about to turn to the problem of ways and means a together of 624,624 tons, against 1.323 tons as to tense. The administration turned last year, an increase of 111,601 tons to the problem of ways and means a long time ago. It created the problem at the very beginning by putting labor practise the favorite Democratic management of the work, according to their own plans and specifications. On this subtons last year for remark:

"We are informed from Washington that the administration is about to turn to the problem of ways and means a form last year.

VAN DINE REPORTS

Cane Pest By Hawaiian Expert

D. L. Van Dine, who was formerly entomologist of the Hawaii Experiment. Station, has published a bulletin on Porto Rican cane posts, He estimated that the ioss in Porto Rico would reach near 700 ounds of sugar per acre because of the attack of cane borers, which, with the figures given, would reach a loss of about one-quarter millions of dollars to that island. The losses are not only made by the boring damage to the canes. but also by the fungi, bucteria, and inects which obtain access to the cane sundry. City planners yearned fathrough the openings made by the larvae. for purposes of beautification. These result in a very considerable loss

in tonnage.
The Porto Rico beard of commissioners! roduce enemies of the borer from abroad. themselves should endeavor in every pracborer reduction, by exterminating those that they can and by need cane selection.

Borer Infeats Grass Crops

According to the fact that this same borer will attack corn and para apland rice, so that the attacks of the

ing of non infested seed; second, the simultaneous planting and harvesting of large areas of cane land; third, clean mitivation both before and after.

It is a somewhat notable fact that the injury to the cane is greatest where the canes are growing under favorable concitions. It is found that healthy, vigor-ous canes were injured less than those that for any cause seemed to be stunted and weak. Considerable attention has been given to the question as to whether or not certain varieties of sugar cane were more or less immune to the attack of the borer but no definite conclusions were reached by this point. Burning Trash Poor Practise

Reference is made to the fact that T. E. Holloway of the United States bureau of entomology published in the Louisiana Planter of December 29, 1913, an article regarding the burning of trash in which he stated that the experiments conducted in Louisiana and in Texas indicated that the infestation was greater by the borer on lands that had been burned than on lands where the trash had

The conclusion is that in burning cane holds them down to their present level and a number of other reprehensible of activity is destroyed by burning proportionately to the borers destroyed and "The deficit must be made up by di- that little or no advantage, or even some

COFFEE OUTLOOK IS FAIR SAYS HIND

John Hind who returned from San Francisco on the Withelmina yesterday will go home by way of Hilo. He brought along a new machine which will be unleaded there. Mr. Hind said that conditions seems to be slowly in proving on the mainland, Busines has been very slack all summer. real estate market on the Pacific Court has been absolutely dead.

Present indications are that coffeprices will continue at about their present level for some months. demand for Kona coffee is fair perhaps more could be sol, than is now in sight. The Konn crop will be late this year. There was a very good flush, Mr. Hind said, but rains came before the berry had set and as a resuit some fields which normally yield good crops are almost bare of crop this year.

WAIALUA ENDS SEASON Waidna Agricultural Company has finished grinding its 1915 crop and is

now drying off its low grades. The finals will be announced as soon as the drying off is completed. SLIDES COST MONEY

The Minnesotan carge was landed at New York at 3.89 last Wednesday. When she sailed sagar was 4.64 so that this go lost \$128,300 in transit. The slides the Panuma Canal cost the planters \$237,500 on the cargoes of the Panaman and Columbian. These vessels left Hawait when sugar was selling at 4.64 and 188 respectively. Both ships reached port when prices had fallen to 4:13, having been delayed about two weeks at the -+-+--
